We ellip the above from the Chicago Tribune. This calmate of Gen. Grant's strength in the coming convention is probably correct. But it is not quite true that every Sinte has pronounced for him. Rhode Island is an exception and, we think the only one. In our state convention no action was taken on the subject and no Instructions were given to the delegation. The Duilg News is the only paper in the State that has openly and unequivocally es- when General Thomas applied to be placed poused his cause. VALUE COLE PROTOGRAPH.

The other day Marshall Murray went to the Post Office and took a letter directed to a gentleman in this city. He took it to his utilice and addressed a note to that gentleman, requesting him to call on him at i certain hour named. He came. The Marshal handed him the letter and the gentlerusu put it in his pocket as it was addressed to him. "If would like to have you open that letter" the Marshal said. The man demurred; he prefetred to open it at home. Finding resistance useless the envelope was reluctantly broken. It held nothing but a photograph, and quite an ordinary one at that. There was not a scrap of writing in the envelope, nor any intimation from whence the Photograph came. The only thing about it which attracted attention was its thickness. It was stout and firm, unnecessarily so for transmission through the mails. After examining it carefully the Marshal took his knife and separated the parts. In the centre was ingeniously inserted a thin layer of the finest kind of relvet cork. The cork was studded with diamends, about seventy in number. 'The Marshal placed the photograph in his sate yers were wrangling and the gentleman retired.

SIDEND HIDING PLACE. The other day a gentleman stepped ashore he landed an officer from the Marshal's is the latest specimen : The true Moses was office asked him to accompany him to a the meckest of nich; our Meses is the most carriage. THE VALUE OF SYALL FIRE ENGINES .- A writer (Joseph Binl) to the Scientific Amer ican, makes an able plea for the use of small hand engines, in every piace, in addition to the large steam fire engines now becoming so common. He says that a cast from pump, which will weigh no more than this daty as a soldier to announce it as his 40 pounds, and can be set in a water pail, with six feet of hose and a 3-3 inch pipe, dollars, would preserve many a lown from severe fices.
